Dr. Brown Hopes for 'Great' Architect for University Center

• UNIVERSITY VICE President John A. Brown said last Tuesday that he would be disappointed if a "great" architect is not hired to design the new University Center now in the planning stage. He hopes that the Center will be the "first really fine" collegiate building on the campus.

Speaking at a meeting of Tasseis, sophomore women's honorary, Dr. Brown said that an architect would probably be hired within the next two weeks. He pointed out that, since architects' prices are controlled, a great one costs no more than a mediocre one. The difference, he said, is that you can tell a poor architect what to do but must take orders from a great one.

Dr. Brown predicted that the "mediocre character of University architecture" will be alleviated when a few old houses are torn down and some "exciting" buildings are erected.

The site of the new building, according to the vice president, will probably take up some of the space now occupied by the School of Pharmacy, ROTC, and the faculty parking lot. The building will not be ready for at least two more years.

Dr. Brown said that the student body probably will pay for the new Center through some sort of fee levied against all full-time students. The fee, he said, will almost certainly be a part of a

general Activities Fee, and will be the legal basis for the loan that will finance the building.

Facilities to be included in the Center were decided upon by the University Center Advisory Committee on the basis of recommendations by the organizations which will use the building. The Center will house work and meeting areas for organizations; lounges; a service center with bulletin boards, ticket offices, mailboxes, lost and found, etc.; and a large unencumbered space useable for receptions, dances, and large meetings.

The committee, Dr. Brown said, approved almost unanimously a rathskellar serving beer in the basement of the Center. Other recreational facilities approved by the committee, if the loan will cover them, include a swimming pool, bowling alleys, pool tables, and ping pong tables.

Eating facilities will include a cafeteria and a more formal dining room, a combined coffee shop and snack bar with vending machines, and a faculty dining room.

Dr. Brown spoke for a while on the philosophy of the University Center, pointing out that the aim of the Center is to bring together all of the University population, students, faculty, administration, and alumni.

A university can be no greater than the morale of its student

body, he said, and for this reason the Center has been given equal priority with the proposed Science Center.

In answer to student questions, Dr. Brown said that there will be lockers for commuting students in every available space in the Center. He said that when he first came to the University and was talking to people about the school's needs, one dean asked him tearfully, "Couldn't we get some lockers for the commuters?"

There will be hotel space in the Center, Dr. Brown said, if the loan will allow it and no other facilities on campus seem better suited.

During a question period after his talk, Dr. Brown said that the Center was not part of a move to make the University a full-time resident school and to discourage part-time students. He said that the full-time student's program shouldn't be geared to the part-time student's convenience and that he would like to separate the two. To do away with part-time courses completely, he pointed out, would mean doubling tuition.

Dr. Brown favors separate programs with the same faculty. He said that full-time students shouldn't have to take night courses.

Several new buildings are now in the planning stages, the vice president told the girls, including a science center, medical school, national law center, and a research building for the National Science Foundation.

The new buildings have once again posed the old problem of space. The University already owns virtually all the land in can acquire in the area, since it is bounded by the State Department and Pennsylvania Avenue. Therefore, building will have to be done on the parking lots. Land value in the area is \$40 per square foot.

Career Conference Revision Announced

• UNIVERSITY PROFESSORS Dr. Hugh L. LeBlanc, political science; Dr. John W. Skinner, economics; and Professor Donald C. Kline, art, will be among the speakers at the Conference on Curriculums and Careers, Feb. 6 at 8 pm in Lisner Lower Lounge.

Chairman Paul Horowitz announced a major departure in this year's conference. "The Conference on Curriculums and Careers has been designed to solve the major problems incurred by our student—namely, 'What shall I major in?,' thus becoming a significant phase of our orientation program."

The new format for the conference has been planned to allow students the opportunity to meet with the representatives of two departments of their choice. At each meeting departmental representatives will discuss their field, University requirements for a major in that field, and the opportunities for future work in that major.

Following the two 35-minute forums, a series of meetings will be held which will concentrate on career information and graduate work. The last forum is specifically aimed to aid junior and senior students.

Prior to the forums there will be a general meeting in Lisner Lounge at which students will be able to obtain guidance from the Curriculums and Careers Committee on which forums they should attend. A coffee hour will be held following the third forum.

Other students working on the conference committee are: Paul Slattery, publicity chairman; Ken-

ny West and Janet Weisblut, publicity subchairmen; Hy Knott, comptroller and assistant to the chairman; Bill Gralnick and Marilyn Silverman, arrangements chairmen; and Howard Balaban, Doreen McKenna, and John Baer, program subchairmen.

Present Council Passes Buck On Change Proposal

• AFTER DISCUSSING the Planning Commission proposals for reorganizing student government for almost an entire semester, the Council voted Wednesday night to recommend to the incoming Council that it consider for adoption its plan for changes in Student Council composition.

The suggested changes include establishing a Council composed of class officers selected proportionally, residence representatives selected proportionally from all men and women, a representative from the Graduate Council, and a president, vice president, comptroller, advocate, secretary, member-at-large, student activities director, and representatives from the Law School, Medical School, and Engineering School.

In other Council business, it was decided to limit the number of persons allowed to demonstrate for a candidate for student office. The motion would limit the number of demonstrators in a street rally to ten. The use of WRGW by campaigners was also approved, with the stipulation that candidates be permitted equal time.

Korean Dancers, Musicians Appear At Lisner Jan. 24

• THE 5000-YEAR-OLD Magic Dance depicting animism, shamanism and old Taoist beliefs will be performed for the first time in this country, as part of the program of the Sahm-Chun-Li Dancers and Musicians of Korea who will be appearing at Lisner, Jan. 24, at 8:30 pm, sponsored by the Institute for Contemporary Arts in conjunction with the University Consortium.

"The Dancers and Musicians of the Three Thousand League Land" bear the symbolic name of Korea during her Golden Age. The com-

pany, consisting of all of the country's greatest dancers and a select group of famous musicians and singers, is trying to restore and preserve the classical and folk arts.

Four categories of dance will be explored. The Magic Dance seeks to evoke the blessings of the gods; The Buddhist Ceremonial Dances were originally introduced by wandering monks who converted the populace by playing and singing in the streets and marketplaces. The dances, though appearing in the first century BC are still current. The Mask Dances were originally mimed designed to give moral lessons, then used to satirize the court. Finally, the Court Dances are delicate and spiritual spectacles. The orchestra will alter composition and instruments to suit each dance form.

Tickets for the dance program will be distributed in the Student Union, daily from 12-1 and 5-6 pm, beginning Monday, Jan. 13.

Another import from the Orient, the famed Japanese Kyogen Drama, sponsored jointly by the Institute and the Japan-American Society, will be appearing at the Department of State, West Auditorium, 2201 C St., NW, Saturday, Feb. 1, at 8:30 pm, and Sunday, Feb. 2, at 4 pm.

Kyogen dates back to the 14th century. The acting is stylized but realistic and the plots are satirical pictures of life in medieval Japan. The artists, Manzo Nomura and his sons Mansaku and Goro have had long and distinguished careers in the Japanese theatre.

Tickets for these performances will be sold at the student price of \$1 in the office of Ed Ferrero from 1-3 pm, daily, in Lisner.

• WON-KYUNG CHO, famous Korean folk dancer, is appearing at Lisner on Jan. 23, at 8:30 pm.

University Calendar

- Wednesday, Jan. 15
University Chapel, The Reverend Doctor Henry B. Luffberry, St. Paul's Lutheran Church, 12:10 pm, 1906 H St.
Last day of fall semester classes.
- Saturday, Jan. 18
Basketball-Richmond, Fort Myer, 8:30 pm.
- Monday, Jan. 20
Beginning of final examinations—through Saturday, Jan. 25.
- Monday, Jan. 27
Placement Tests and Waiver Examinations.
- Thursday, Jan. 30
Registration for spring semester, noon to 8 pm.
Application for June graduation due in Dean's office.
- Friday, Jan. 31
Registration, noon to 8 pm.
- Saturday, Feb. 1
Registration, 10 am-1 pm.
Basketball-Maryland, Fort Myer, 8:30 pm.
- Monday, Feb. 3
Spring semester classes begin.

No More Horrors . . .

• WHETHER TO DEFACE or reface the campus will be the question when the University begins its extensive building program during the next few years. Although construction will not start immediately, decisions must be made now to insure that another horror of the calibre of the present House Office Building or the School of Government Building will not be brought into the world. Urban blight is a term which may be stretched to include not only slums but brand-new structures, as well.

According to vice president J. A. Brown, an architect will be hired for the new University Center within the next two weeks. He noted that when costs are considered, as they must be, a great architect costs just as little as a poor or mediocre architect. It is foolish to get stuck with a concrete block. Washington architecture runs the gamut from debased to excellent, as evidenced by the recent awards which went to area housing projects last week.

Good architecture can be both functional and beautiful. The recognition given to aesthetics on other campuses is obvious. The buildings at MIT and at Brandeis, for example, have won world-wide recognition for their designers and the focus of national attention upon those campuses. Every bow to ugliness is not economy but wastefulness. Buildings are made to last. There is sufficient ugliness in the world without setting out to add to it. According to the vice president, once again, the problem, if it can be so termed, which a good architect causes is his insistence upon his own autonomy. He won't take orders. A poor designer is more than happy to take the advice of those who know less than he. Administrators should stick to administration, architects to architecture, and we'll be serving the community as well as ourselves.

Mockery . . .

• UNCONTESTED STUDENT COUNCIL elections are the greatest examples of student apathy and frustration at the University each year. For the past few years elections have generally been a mockery. The offices of president and vice president were even unchallenged in 1962. Last year approximately two-thirds of the offices were decided before the student body had a chance to register its sentiment on the campus-wide ballot. It is our hope that neither timidity nor apathy will restrain worthy candidates from seeking election to the student legislature.

The number of ballots cast has been increasing, it is true, but the increase is due more to the increase in full-time students than to an increase in student pride in their form of government. But the blame should not rest entirely upon the student body unless it is unresponsive to the fervor drummed up by the present Council and the aspiring office seekers. However, is interest really desired by many of the "leaders" on campus? This question can best be answered by the practical consequence of a lack of student interest.

This year, as in the past, any office that has not been petitioned for by the closing date, Feb. 7, will undoubtedly be filled by "a man with experience" who has previously served as assistant co-chairman in charge of refreshments for Career Conference. With vacant offices, seven or eight fraternity brothers can march into the Student Activities Office, petition for the unoccupied posts, and calmly walk out knowing that they have obtained for their organization a role of dominance on the Council for the coming year. Write-in ballots are not counted.

More fundamentally, this yearly ritual guarantees the student body nothing more than pot luck in its campus representative. The minimum 2.0 academic requirement guarantees the University student that his officers may be no more than a little below the all-student average.

The HATCHET encourages students to prevent this legal form of "ballot stuffing" from recurring by seeing that all offices are contested.

Vote . . .

• TWENTY-ONE YEARS gives a student the license to drink legally in the District and, for the first time, to vote in a Presidential primary and a Presidential election.

The HATCHET urges all students who are of age to register during spring semester and to take advantage of their voting prerogative.

• DESERTED NOW, BUT these study cubicles, under construction in the new women's residence hall, will probably be getting their use at this time next year. Renovations are in progress in the dormitory, scheduled to open in the fall.

Renovations Progressing for New Women's Dormitory

By Pat Bowerman

• AT THE MAIN entrance to the large nine-story building at 1900 F St., there is a small sign which reads:

NOTICE
PROPERTY OF
THE
GEORGE WASHINGTON
UNIVERSITY

The 'Park Central Hotel has moved to 705 18 St., and the building formerly known as the Park Central, now referred to as the University's "New Residence Hall for Women" stands empty, waiting for the coming fall semester, a new name, and 1,131 girls.

At a cost of \$950 for room and board for the academic year, girls will receive the extras of carpeted halls, spacious rooms, three elevators, a cafeteria and snack bar, an infirmary, and air conditioning.

Each floor will operate as a separate unit with its own name, student government, study lounge with small alcoves and laundry. There will be a second lounge with adjoining kitchen and three extra baths on each floor.

The 124 girls on each floor will be divided among 32 suites. In addition a suite will be provided for two graduate students acting as floor counselors. Each suite will house two, three, four, or six girls, with study or dressing alcoves, and a bath. There will be closet space and a desk for each girl plus bookcases, chairs, and chests. The bookcases and desks will be built in.

The first floor will include a two-story lobby, a package room and mail rooms, an infirmary and an apartment for a nurse, a formal drawing room, a large study room, the resident director's apartment, a typing room, cubicles for counseling, and a commons room, in addition to the office and staff rooms.

The cafeteria and snack bar will be located at the basement level with dining space for 425 people. Plastic skydomes in the ceiling, below the open court will provide natural lighting for daytime dining. Folding partitions will be available for closing off private areas of the dining room.

Mrs. Amelia Carew, assistant to the dean of women, explains that the partitions will promote get-togethers of small groups of students and of students and faculty members.

Blueprints of floor plans and furniture layouts are on display in the lobby of Strong Hall. A plexiglass model of sample rooms is being made.

Remodeling has not been start-

ed but the architects, Mills, Pettit, & Mills, have completed the plans and are now receiving bids from contractors. No decisions have been made about the contract for the remodeling or the contract for the food service.

Girls now living in dormitories will apply for rooms in the new hall early in March. New residents can apply later.

Strong Hall is the only dormitory now in operation which will remain as a hall for girls. Seniors will receive preference in their applications for Strong, which has single rooms. Residents there will not be required to purchase the food plan.

Crawford and Madison Halls will become men's residence halls, and the name of Madison will be changed from Dolly to James.

Sharkey Discusses Whig Economy At American Historical Convention

• DR. ROBERT SHARKEY of the University faculty told an American Historical Association discussion session that the United States was wise to "opt for anarchy" rather than adopt the planned economy of the Whig Party in the 1840's and 1850's.

Dr. Sharkey was the only University delegate on the program of the AHA's annual convention Dec. 28-30 in Philadelphia. Other faculty members attending included department chairman Roderic H. Davison, Wood Gray, C. J. Herber, Elmer L. Kayser and James I. Robertson.

Sharkey's remarks came in a critique on papers presented during a session on "Politics and Economic Development in 19th Century America."

Nathan Miller, of Wisconsin, said in a paper that Whigs thought in modern terms of economic policy, and sought a well-regulated currency and bankruptcy laws. The Whig program, a reaction against Jacksonianism, was never put into effect.

Sharkey countered that the seemingly reasonable ideas actually date to the mercantilists' nationalist philosophies. He said the proposed laws merely rationalized the interests of Northeastern businessmen-creditors at the expense of debtor sections.

"If these ideas were important, then the economy should have slackened after the defeat of the U.S. Bank and Nicholas Biddle in 1832," he said.

However, Sharkey said, the

GW Professors Among Speakers For Civ Course

• EIGHT UNIVERSITY professors will participate in lectures of the new American civilization course series for which second-semester juniors, and seniors may register next semester.

Among those slated to speak are: Elmer Kayser, historian and professor of history; Archibald Woodruff, dean of the School of Government; Wood Gray, professor of history; Hugh L. LeBlanc, chairman of the department of political science; H. M. Merriman, professor of history; Robert Willson, professor of journalism; F. N. Hamblin, dean of the School of Education; and Robert Sharkey, professor of economics.

In addition to the lecturers already announced, two other speakers in fields from architecture to physics will also address the group at various times during the semester.

The architect is Rai Y. Okamoto, a teacher and specialist in urban design. Mr. Okamoto, who holds Master's degrees from Yale and MIT, has taught at University of California, MIT and the Royal Danish Academy in Copenhagen. He worked with the firm of Skidmore, Owens and Merrill, and with John Carl Warnecke, the architect employed to redesign Lafayette Square.

The physicist, Dr. Ralph E. Gibson, director of the Applied Science Laboratory of the Johns Hopkins University, is an Englishman by birth but an American by adoption. Dr. Gibson received his BS and Ph.D. degrees from the University of Edinburgh. From 1929 to 1939 he was lecturer, then adjunct professor of chemistry at the University. He had previously been a member of the staff of the geophysics lab of the Carnegie Institute. During the Second World War he was vice-chairman of National Defense Research, and later director of Allegany Ballistics Laboratory. He is the recipient of numerous prizes and honors and is a fellow of the American Rocket Society and the Institute of Aeronautical Sciences, and a member and former president of the Cosmos Club.

The course, which may possibly be the first of its kind in the United States, is being administered by the American Thought and Civilization faculty of the English department, but is a non-departmental offering. The schedule for discussion sessions will be posted during exam week.

country, after a brief depression, experienced "great growth" under Jackson's pro-debtor, laissez-faire policy.

"The United States was wise to opt for anarchy," he said.

Dr. Gray, who attended the session, said, "In my judgment, his (Sharkey's) was the most interesting part."

Some 70 discussion sessions were held during the three-day meeting. Dr. Sharkey, in his first year here, teaches courses in both the history and economics departments. He is author of "Money, Class and Party," an economic study of Civil War and Reconstruction.

In other convention business, Dr. Davison was named to the executive committee of the newly-formed Peace Research Conference Group. The group will provide a clearing house for information on peace research, encourage scholarly studies of peace, and plan meetings for next year's convention in Washington, D. C.

• ACCORDING TO Steve MacIntyre, the newly formed ice hockey team will be disbanded for this year. The team needed fifteen players to enter a local league, but was only able to get 12 players. Steve hopes to find openings in the league for the GW players to get experience and next year an effort will be made to again organize a team with Student Council backing.

Campbell to Go to Calcutta To Aid in Regional Planning

by Boyd Foush

• Dr. ROBERT DALE Campbell, chairman of the department of geography and regional sciences, has been granted a one-year leave of absence to participate in a Ford Foundation-sponsored urban and regional planning effort in Bengal Province, India.

Dr. Campbell is to leave Washington Feb. 15, after submitting a report on the need and availability of open space in the metropolitan area, compiled by the geography department under a \$15,000 contract from the Joint Open Space Project Committee.

He will not join the team of program specialists in Calcutta until mid-March after making stops in Hawaii, Japan, Taiwan, Hong Kong, Manila, Jakarta, Bali, Malaya, Thailand, and Burma. Dr. Campbell explained, "A geographer just can't go by all this real estate without stopping."

The long-range task of the 26 experts who will participate in the project at one time or another is to plan the development of the area not only acting in accordance with the physical needs of the population, but taking into consideration those ethnic psychological characteristics which determine what type of innovations will be most acceptable to the Indian people. The project will also train Indians in the science of planning.

Dr. Campbell explained that since World War II the population of Calcutta has mushroomed from 1 million to 8 million, and today a considerable number of people without houses virtually live in the streets.

The region was drastically affected by the creation of the Moslem nation of Pakistan and the resultant dislocation of peoples. The balance between agriculture producing areas and food processing regions was also affected by political change.

The regional scientist was sent abroad for the academic year '52-53 to lecture on geography at Alexandria University, Egypt, as part of the International Educational Exchange under the Fulbright Act. He was again a Fulbright lecturer in 1957 at the University of Peshawar, Pakistan. While in Peshawar he traveled in Pakistan, conducting research in the cultural characteristics of the region. The result of this study was his book, published in May, 1963, *Pakistan: Emerging Democracy*.

Soon to be published is *A Question of Place*, a collection of writings showing the development of geographic thought from Herodotus to the present. Many of the selections included have never appeared in English, and were translated by the senior author Eric Fischer, a professorial lecturer in the geography department.

Fischer and Campbell are co-authors along with Eldon Miller,

a University teaching fellow in geography.

Dr. Campbell is now in the process of writing another book, *Place and Personality*, which also deals with psychological geography.

Dr. Campbell, who advocates the tremendous need for applied geography to plan for intelligent use of the earth's resources, recently concluded a planning study with recommendations on the economic future of four Pennsylvania counties. This project for the Area Redevelopment Administration was conducted jointly with Dr. H. L. LeBlanc of the

Dr. Robert Campbell

University political science department. Dr. Campbell and Dr. LeBlanc also cooperated in the creation of a town plan for the Pine Ridge Reservation for Sioux Indians in South Dakota.

In 1960 when Dr. Campbell, Dr. LeBlanc and Martin Mason, dean of the Engineering School, were conducting a survey of the extent and potential of U. S. shorelines for the Outdoor Recreation Resources Review Commission, an extreme case of erosion was reported. An envelope containing a questionnaire was returned bearing the following legend: "City of Bayocean, Oregon, abandoned. Washed into Ocean."

Dr. Campbell received his BA in English at the University of Colorado, where he was elected to the Phi Beta Kappa, in 1938 and earned his Master's in geography from Colorado in 1940. Since receiving his PhD in geography from Clark University in 1949, he has completed numerous publications and practical projects both promoting and embodying the principles of optimizing the man-earth relationship.

In a 1949 magazine article he wrote, "Our country should not depend forever on technological advance to relieve the burden of past folly."

He describes the geographer as a much misunderstood specialist whose material is earth, but whose chief concern is man. He says, "Geographers have always been occupied with the pragmatic approach of application, but in the past most have been occupied with things of monumental unimportance."

Chain Letters Are Illegal But Impossible To Trace

• "THE NAMES ON a chain letter amount to a sucker list," replied the Post Office employee to the HATCHET'S inquiry. "But even though it is illegal to send one through the mails, it is almost impossible to trace one back to its originators, and we seldom try."

With nostalgic smiles, employees and patrons halted work to explain the mechanics of the letter and some of their past experiences with those such as the one now circulating around the University.

"Chain letters reached the height of their popularity in the twenties, when even big bankers and financiers took part in letters that cost as much as \$500.00. At that price, not many could afford to break the chain once they bought in, and those letters would stay in circulation a good long time," recalled one man. This man also claimed to have made \$14,000 off a twenty-dollar letter.

Although letters involving exchange of liquor, golf balls, and other commodities are not known, no chain letter calling for money has been encountered within the past fifteen years by anyone in the Post Office. With the advent of the recent five dollar letter, George Washington seems to be reviving another tradition.

The mechanics of the ordinary chain letter are as follows: After

buying a letter on which, for example, five names are written, the buyer will write two checks for half the purchase price to the name at the top of the list. He will then make two copies of the letter, removing the top name and adding his own to the bottom, sell each copy for the original purchase price, and give each of his buyers one of the checks, which the buyers will promptly mail. Presto! He has already gotten back his investment, and when his name comes to the top, he will receive a sum many times his original payment. That is the theory, and as long as buyers can be found who will not break the chain, it works.

The problems are that the buyer market must be limitless in order for everyone to profit, that the receiver has no legal recourse if his checks bounce, and that anyone can start a chain letter by putting his name and those of several friends on a piece of paper and letting an unwitting buyer do all the work for him.

● INTRAMURAL BASKETBALL resumed action following the vacation break on Thursday, as Law defeated Calhoun, 47-26.

Calhoun got off to a bad start, scoring only eight points in the first half and trailing, 21-8, at half-time. Andrews, the only player on either team to hit in double figures, was high for the game, contributing ten points to the Law total. DThPhi outscored a hustling LSAS quintet, 50-38. Lottridge led DThPhi to a five-point halftime lead by dropping in 15 of his team's 25 points. Lottridge finished with a total of 25 for the evening. Also finishing in double figures were Strecker of DThPhi and Murphy of LSAS, each with 15.

TEPS Down SAE

The high-scoring TEP's had to work hard to down a stubborn SAE team, 48-44. TEP hung on to its four-point halftime advan-

tage, as Gary Lyle caught fire in the second period, pumping in 15. Lyle's total production accounted for 22 points, the game high. Nalls, of SAE, contributed 16 in SAE's effort.

Fine defense and high-powered offense work by the Gents-2 proved too much for an outmanned PSK team, as the Gents rolled up a 42 point victory margin, winning 59-17, on Friday. PSK was held to only seven points the first half, and ten in the second. Meanwhile, Stull was occupied in hitting for 20 points for the Gents.

Carl Kneessi's ten points paced the Delts to a 34-28 win over SX. In the following contest, another Gent team downed AEPI, 56-44. Fred Dorazio's 33-point effort was the outstanding feature of the game. In the only other Friday game scheduled, the Hillites won over PIKA.

TKE's classy offense was never closely challenged by PSK Saturday, as TKE emerged victorious, 83-50. TKE employed only one half of its Feldman team in each half. Jon scored 23 in the first period, and brother Jeff 16 in the second, for a total of 39. As for individual efforts Bill Dierks of PSK was high for the

game with 34, followed by R. Snodgrass of TKE with 21.

Gents Beat Law

The Gents-2 outscored Law, 47-38. The Gents broke the game open in the second half after carrying only a four-point lead into the halftime break. Andrews accounted for the greatest part of the Law scoring total with ten points. In the other Saturday game, DThPhi defeated PIKA.

Sunday's schedule was cancelled due to weather conditions making travel difficult. Thus, the Med Soph-DTD, Hillite-Calhoun, LSAS-AEPI, and TEP-Gents-1 games were not played. SAE, SX, and TKE drew byes on Sunday. In neither the "A" or "B" League are contests scheduled for the coming week because of the proximity of final examinations. The following is the schedule for the opening week's action in the "A" loop spring semester:

Friday, Feb. 7

PSK vs. AEPI, 6 pm.
Gents-2 vs. DTD, 7 pm.
Hillites vs. SX, 8 pm.
PIKA vs. Gents-1, 9 pm.

Saturday, Feb. 8

PSK vs. Law, 4 pm.
TKE vs. PIKA, 5 pm.
Byes: DThPhi, Gents-2.

Sunday, Feb. 9

Gents-1 vs. TKE, 5 pm.
SX vs. LSAS, 6 pm.
DTD vs. Calhoun, 7 pm.
AEPI vs. TEP, 8 pm.
Byes: Hillites, Med Sops, SAE.

The Med Frosh and Calhoun initiated play in the "B" League on Tuesday, with the Med Frosh emerging on the long end of a 46-16 score. The Med Frosh featured a balanced attack, with nine players breaking into the scoring column. Marvin set the game pace with 14.

SX Loses

The Gents went to work in the second half and rolled up an eleven point edge to down SX, 38-27. Vyts Tarulis scored half

of SX's points in the first half, as they ended up with only a two-point disadvantage at the end of the period. Dick Duenkel matched Tarulis, and ended the night with a total of 14.

SN squeezed by KS, 37-35. Jim Paulson, KS's stalwart, pumped in 19 points into a losing effort. SPE and the Yahus drew byes.

Mark Isenberg and Joel Shulman were the big guns for PhiSD, as the Phi Sigs whipped by Adams, 45-34. Isenberg's 15 was high for the game, followed closely by Shulman's 13 point effort. AEPI's undefeated squad kept its perfect record intact, downing previously unbeaten TEP, 37-36. Herb Lewis was hot for the TEP's with 17 points, while Kramer led the victors with 12. TEP-2 and PSK had byes.

The Med Frosh let loose a 43-point attack to upend ROTC, 43-27 on Saturday. Wong, of the Med Frosh, stood out, pumping in 14 points. Med J&S walked off the court with a 56-33 win over Calhoun as W. Anderson, Madsen, and D. Anderson all ended up with double figures.

AEPI continued its winning ways with a 37-32 triumph over SAE, as Bobby Meador's fine 20-point effort went for nought. The Yahus, T. Tau, and SX had byes.

Adams Wins Sunday

Adams outscrapped KS, 29-28, Sunday, as Jim Paulson again paced the scoring. AEPI-2 overcame TEP-2, 27-25. Cares had a good afternoon in a losing cause, tossing in 19 points. The SAE-TEP-1, PSD-DTD, and SN-Pharm games were cancelled, and SPE and the Ragauts drew byes. Our two days of action are scheduled for the coming week. As in the "A" League, play will resume following the semester break. The schedule for the coming week and the first week of next semester:

Monday, Jan. 13

ROTC vs. Ragauts, 6:00.
DTD vs. Gents, 7:00.
Med J&S vs. T. Tau, 8:00.
Phar vs. AEPI-2, 9:00.

Tuesday, Jan. 14

Yahus vs. Med Fr., 7:00.
SN vs. SX, 8:00.
Calhoun vs. SPE, 9:00.
Byes: Med Fr., SX.

Monday, Feb. 3

ROTC vs. Med J&S, 6:00.
Pharm vs. Ragauts, 7:00.
DTD vs. T. Tau, 8:00.
AEPI-2 vs. Gents, 9:00.

Tuesday, Feb. 4

Gents vs. SN, 7:00.
Yahus vs. Calhoun, 8:00.
KS vs. SPE, 9:00.
Byes: Med Fr., SX.

Saturday, Feb. 8

Med Fr. vs. Med J&S, 12:00.
T. Tau vs. SAE, 1:00.
SX vs. Yahus, 2:00.
AEPI-1 vs. Calhoun, 3:00.
Bye: ROTC.

Sunday, Feb. 9

PSD vs. Ragauts, 1:00.
TEP-1 vs. DTD, 2:00.
TEP-2 vs. SPE, 3:00.
Adams vs. SN, 4:00.
Byes: SAE, AEPI-2, Pharm, KS.
This week's results:

"A" League

Law-47; Calhoun-26.
DThPhi-50, LSAS-38.
TEP-48, SAE-44.
Gents-2-59, PSK-17.
Hillites-2, PIKA-0.
DTD-34, SX-28.
Gents-1-56, AEPI-44.
TKE-83, PSK-50.
Gents-2-47, Law-38.
DThPhi-2, PIKA-0.
Med Sops vs. DTD-cancelled.
Hillites vs. Calhoun-cancelled.
LSAS vs. AEPI-cancelled.
TEP vs. PIKA-cancelled.

"B" League

Med Fr.-46, Calhoun-16.
Gents-38, SX-27.
SN-37, KS-36.
PSD-45, Adams-34.
AEPI-1-37, TEP-1-36.
Med Fr.-43, ROTC-27.
Med J&S-26; Calhoun-10.
AEPI-2-27, TEP-2-25.
KS-28, Adams-27.

Humanities . . .

Associate Dean of Faculties John F. Latimer has been elected for a term of three years to the American Council of Learned Societies as the delegate from the American Philological Association.

The ACLS is meeting in Washington Thursday through Saturday this week. One of the principal items of business to be considered is the formation of a national humanities foundation, comparable to the National Science Foundation.

Final Exams Near; Cramming Starts

by Sam Gilston

ALONG WITH THAT marathon bout known as finals comes that ancient academic custom of defying gravity called "cramming." Cramming, as everyone knows, is that act of staying up 180 hours without sleep and immediately going into 180 hours of exams.

The history of cramming dates as far back as the history of exams; in fact, it is just a few hours older. Students have always waited until the last minute to study for exams, and, as a result, have had to stay awake for long periods of time in order to do so. We can only guess what the Greek students of Socrates did to stay awake studying for the interrogation by their instructor.

Some extremists have the theory, and it must be realized that it is only a theory, that the more you study, the more you know. Such a theory will always tend to encourage the attempts of students to stay awake and study. This theory is completely rebuked by the Osmosis school of thought. According to this theory, merely perfunctory class attendance will suffice. Advocates of Osmosis will attend a movie the night before an exam and go to bed early. Successful application of this theory depends on the student's Intelligence Quotient, degree of difficulty of the course, and the caliber of students in the neighboring seats. For a student unable to avail himself of one or more of these advantages, it is hazardous to risk being influenced by association with the proponents of the Osmosis hypothesis.

Medical students, who claim to be the world's most diligent students, have probably contributed most to the science of wakefulness. From their ranks came such well-known contributions as sitting on a block of ice, sticking pins under the fingernails, and studying in a cold shower. The familiarity of medical students with things physiological explains their ascendancy in the constant development of improved techniques in this as in other collegiate activities. We must not, however, forget the efforts of others, such as the law student who originated the method of standing on one's head in the hope that gravity will keep the eyelids open.

Modern science has recently revolutionized the process of cramming with its contribution of wonder pills such as No-Doz, Dexedrine, and Dexemyl. Physical punishment need no longer be a part of studying. However, in a serious

vein, the use of drugs can be dangerous. In the hope of clarifying some of the misunderstanding that surrounds the use of drugs, we interviewed University physician Dr. Lamont Pugh for his opinion on the drugs.

Dr. Pugh pointed out that all medicine in general has some side-effects; however, he immediately added that proper use of stay-awake drugs should not be accompanied by ill effects. "It all depends on the toleration of the individual," he said. "What is all

'Population'

THE FINAL REPORT of the University's American Assembly on population problems and contraceptives held in November, was released this week. Copies of the report are available in the office of Public Relations to students with special interests in the field of population studies.

right for one person may not be all right for another."

Dr. Pugh went on to discuss some of the different pills on the market. "No-Doz is just concentrated caffeine. You can get the same effect drinking a lot of coffee. You don't have to heat water. It is relatively safe if the directions are followed."

A drug of more serious effect is Dexedrine. Dexedrine requires a prescription, whereas No-Doz can be purchased without one. "The danger," Dr. Pugh stated, "is not to the people who use it with a doctor's consent, but to those who obtain it from a roommate or friend. Almost all of the

individuals who suffer ill effects from Dexedrine have used it without a prescription." Again he stressed the importance of following instructions and not over-using. "Sometimes," he said, "a student will get a good result from a single Dexedrine and say, 'If one pill can make me feel so alert, imagine what two pills will do.'" Dr. Pugh warned that there may be a reaction to the drug which will cause a period of depression and let-down the following day.

A side-effect of Dexedrine is loss of appetite. This, Dr. Pugh said, is unhealthy, for some individuals. An overdose of the drug might result in restlessness, dizziness, insomnia and the shakes. The most important thing, Dr. Pugh pointed out, is the need for the sensible use of all drugs.

A drug which Dr. Pugh considers better than Dexedrine is Dexemyl. Dexemyl will also keep you awake, but contains a calming drug which tones down the effect of Dexedrine. This is not always the case, however. Dr. Pugh again said, "What is one man's meat can be another man's poison. I know of one student who took Dexemyl and said he felt like throwing rocks at a funeral."

Sleep is the best aid to effective study. If you plan on taking a pill

Yul Love Yul In 'Kings of The Sun' Say Ron and Bob

AS SEEN BY US
Ron Scheraga, Bob Litman

"KINGS OF THE SUN" is a must—if your parents happen to be Mayan Indians.

We had anticipated another spectacle like "Taras Bulba." Instead we got Shirley Temple playing Indians and Indians—no cowboys.

Yul Brynner is an Indian but acts and walks like the King of

to stay awake, first have a good nap and then be prepared to stay awake all night after you take the pill. Dr. Pugh recommended that drugs be the last resort for staying awake. He outlined what he felt were the best steps to take to stay up. First take a walk in the cold air, then take a cold shower. If these fail, then try No-Doz. Use Dexedrine or Dexemyl or any other drug for staying awake only if the other three methods do not work.

Dr. Pugh's suggestion for easing cramming was: "Start studying the first day of school. If you keep up, you won't have to cram."

Siam. To give him that "white man speak with forked tongue" look, Yul is anointed with all kinds of greasy kids stuff—on his body.

Remember George Chakiris from "West Side Story"? He still thinks he's a Shark. Silly George, he's the King of Mayans and doesn't know it.

Shirley Anne Field, a beautiful and gifted actress from England, plays George's love interest. She cries a hell of a lot and with an English accent yet.

George and Shirley (Clarabell and Princess Summer-Fall-Winter-Spring) get together and live happily ever after in Squaw Valley.

Yul love Yul. He dies and dies and dies. And so does the film.

Are You A Slow Reader?

A noted publisher in Chicago reports there is a simple technique of rapid reading which should enable you to double your reading speed and yet retain much more. Most people do not realize how much they could increase their pleasure, success and income by reading faster and more accurately.

According to this publisher, anyone, regardless of his present reading skill, can use this simple technique to improve his reading ability to a remarkable degree. Whether reading stories, books, technical matter, it becomes possible to read sentences at a glance and entire pages in seconds with this method.

To acquaint the readers of this newspaper with the easy-to-follow rules for developing rapid reading skill, the company has printed full details of its interesting self-training method in a new book, "Advances in Reading Improvement" mailed free to anyone who requests it. No obligation. Simply send your request to: Reading, 835 Diversey Parkway, Dept. 3581 Chicago 14, Illinois. A postcard will do.

COUNT ON CHEVROLET TO BUILD THE ONE YOU WANT

ONE-STOP CHEVROLET SHOPPING never meant more than it does today. Five lines to choose from—starting with the Jet-smooth luxury Chevrolet, then the totally new Chevelle, the better-than-ever Chevy II, sporty Corvair, and the exciting Corvette Sting Ray. And you've got 45 models and 22 engines to choose from.

Chevrolet's Impala Super Sport series tops the lineup with luxury you'll love to get used to.

Chevelle has the room you want in a size you can handle. Chevy II's handsome in sparkling new trim. Corvairs for '64 enjoy crisp styling accents and more power—nearly 19% more horsepower in the standard engine. The famous Corvette Sting Rays have a smoother ride and smarter interiors.

Put all this choice together and you see why you can count on Chevrolet to build the one you want in '64! And it's at your Chevrolet dealer's!

THE GREAT HIGHWAY PERFORMERS Chevrolet • Chevelle • Chevy II • Corvair • Corvette

with others

SCIENCE
AND HEALTH

Satisfying human relationships can make a big difference between success and failure in college. Whether it's a roommate, a professor, your family, or friends, you want to get along well with them. We are learning a lot about this through our study of the Christian Science textbook, *Science and Health* with Key to the Scriptures by Mary Baker Eddy. You can, too.

We invite you to come to our meetings and to hear how we are working out our problems through applying the truths of Christian Science.

CHRISTIAN SCIENCE ORGANIZATION

Christian Science Reading Rooms and at many
college bookstores. Paperback Edition \$1.95.

Spiders Will Try To Break Two-Year GW Win Streak

• **THIS SATURDAY NIGHT**, the hapless Richmond Spiders come to Ft. Myer and they will be out to try to break a two-year losing jinx with the Colonials. The Spiders have lost their last three games against the Colonials; the Buff beat them in their first meeting this year, 60-57.

In that first game, John Telepo, who could be one of the top forwards in the area; Tom Tenwick, a junior forward who showed flashes of brilliance; and Buddy Enck, who shot some excellent outside baskets; could do nothing to the Colonials, who were behind 46-39 with 14 minutes left, when Mark Clark went on a 14-point scoring spree to give him high-scoring honors.

With 45 seconds left on the clock and the Buff trailing by one point, they could not stop "Big Joe" Adamitis as he bought back the lead 58-57, a lead that was kept when Rick Duques stole the ball and went on to score the de-

Colonials Unable To Stop West Virginia

• **THE MOUNTAINEERS** of West Virginia proved too strong for the Colonials Saturday night as the Buff were up-ended 93-74. The loss broke a two-game winning streak gained at the expense of crosstown rival Georgetown and Southern Conference opponent VPI. The victory over Tech came on Monday night at Fort Myer.

Playing the only game of the year at the Coliseum before 4500 fans, the Colonials failed by only one point at halftime, 45-44, as Marty Lentz tapped in a basket at the buzzer. The Colonials led at various times in the first half and were leading 50-48 in the second half when the Mountaineers turned on the steam with a tough zone defense and a fast break.

West Virginia had been having its ups and downs all season, and at one point they were below the .500 mark for the first time in ten years. Their record was squared at 7-7 going into the game as opposed to the 5-8 record for the Buff. Many fans anticipated a repeat of last year's 100-97 thriller, but the Mountaineers went on to win their eighth straight against GW in an extremely disappointing second half for Colonial fans.

Kenny Legins was honored at half-time by the Big Brothers Club of Nanticoke, Pa., his home town. However, Saturday night was not one of his better shooting nights as he hit on only three of 17 field goals and scored only 11 points. The big standout for the Colonials again was "Slim" Joe Adamitis. Since shedding some extra pounds, Joe has been a terror under the boards and from the field. He has moved his average up to 15.0 points per game and then he pumped in 24 points—high for the game. He also hauled down 19 rebounds, six more than any other player on the court.

The game on Monday night was played in an exactly opposite manner. Facing Virginia Tech and all-Conference player Howie Pardue, the Colonials hit on over 50 per cent of their shots for a 97-89 victory. Kenny Legins was the offensive star of the game.

Many Colonials were in trouble

• **THERE WILL BE** a meeting of the lacrosse team Wednesday, Jan. 15 at 4 pm in the Student Council Conference Room. Members should bring ten dollars for a deposit on equipment and a check for their sticks. The team has the backing of the Intramural department and it is attempting to gain varsity status. Anyone interested in joining the team should call 333-9728, Room 402B. The season will start Feb. 8.

with a large number of personal fouls early in the game. However, it was the one and one situation in the second half that helped the Buff keep their lead as they kept converting their free throws.

After losing five games of their first six, the basketball team is now playing exciting basketball. Georgetown had defeated the number one team in the country, Loyola of Chicago, and the Gobblers were 6-1 and on top of the Conference standings along with Davidson.

The freshmen continued to play good ball as they rolled up 128 points against Anacostia Naval Base. Their record is now 5-2.

cise two points from the foul line.

The Colonials, after defeating both Georgetown and VPI and then losing to their perennial jinx West Virginia last Saturday, seem ready and willing to break back into the win column. Their opponents have an identical 3-4 win-loss record in Southern Conference action.

The Colonials are working on the areas that helped lose last Saturday's game and trying to be the team that they were in their last two upset victories. Though the Colonials are not high in the Southern Conference ratings this year, it appears that they are bound to be a team to watch Saturday night.

Hetzel, Pardue, and Selvy Star in Conference Play

• **FRED HETZEL**, hottest scorer in the Southern Conference, led Davidson in victories last week over VMI, 70-58, on Tuesday night and Virginia, 64-62, on Saturday night to keep the Wildcats undefeated in seasonal play. Davidson went up to number 5 in national rankings as Hetzel pulled far ahead of any other conference player in scoring in these two close but decisive wins.

Second-place VPI came out with a 1-1 record in conference play last week, plus adding a 77-72 victory over Wake Forest for good measure, as Howard Pardue continued his hot streak for the Techmen. A senior, Pardue has performed consistently well for the Gobblers, making the all-Southern

Conference team the past two years, setting the school free throw record, and scoring in double figures 53 out of 56 games. In a contest with Mississippi State the North Carolinian hit a deadly 13 of 18 shots for 32 points, bringing the State crowd to its feet in a standing ovation. Although Tech and Davidson don't play in regular season competition, the Southern Conference Tourney might see a close race for first place with the skill of Hetzel and Pardue the deciding factor.

Last-place Furman must have felt a little nostalgic last Wednesday night as David Selvy racked up 25 points, his high point this season, to lead the Purple Paladins over Richmond 74-63. Ten years ago at Furman David's brother, Frank, had one of the most fantastic seasons in collegiate history, scoring 1,209 points with a 41.7 average including a victory over Newberry in which he scored 160 points. David, however, isn't his brother. He had a poor season as a sophomore last year and only a 13-point average this season going into the Richmond game. But, the younger Selvy is learning and Furman hopes he can learn fast enough to pull them out of the cellar.

MEMO . . .
